Power projects in Tamil Nadu

1798: SHRI B.S. GNANADESIKAN: Will the Minister of POWER be pleased to state:

the details of power projects and programmes being implemented and still pending, which were proposed during the Tenth Five Year Plan by Government, for development of power in Tamil Nadu;

whether Government has proposed to formulate and implement more power projects during the Eleventh Five Year Plan in Southern States, especially in Tamil Nadu, since there has been huge power shortage recently;

if so, the details thereof; and

if not, the reasons therefor?

THE MINISTER OF POWER (SHRI SUSHIL KUMAR SHINDE): (a) The target for the 10th Plan for Tamil Nadu in terms of generation capacity addition was set as 1604MW. This included 5 thermal projects aggregating 1364 MW and 4 hydro projects aggregating 240 MW. In addition, 2 additional projects aggregating 172.6 MW were identified for commissioning during 10th Plan. Thus, including the additional projects, 11 projects having capacity of 1776.6 MW were under implementation during the 10th Plan. Out of these 11 projects, 8 generation projects having capacity of 1216.6 MW (comprising of 6 thermal projects aggregating 1036.6 MW and 2 hydro projects aggregating 180 MW) were commissioned during the 10th Plan. Remaining 3 projects *i.e.* Neyveli TPS-II Expansion (2x250 MW), Bhawani Barrage-II (30 MW) and Bhawani Barrage-Ill (30 MW) are under implementation and likely to fructify in the XI Plan.

(b) to (d) During the course of 11th Plan generation capacity addition to the tune of 14920 MW has been envisaged for Southern Region. Out of this 6252.2 MW is envisaged for Tamil Nadu. The details are given in Statement *(See* below).

In addition, according to information available with Central Electricity Authority, in the thermal segment Life Extension (LE) of Tuticorin TPP (3x210 MW) in State Sector and Renovation and Modernization (R&M)/LE of Ramagundem STPS (3 x210 M W) in Central Sector in Tamil Nadu is envisaged to be completed in XI Plan; in respect of hydro segment, Renovation Modernization and Upgradation in respect of Mettur Dam (4x10 MW) and Periyyar (4x35 MW) has been envisaged to be completed in 2007-08 and 2009-10 respectively in the State sector.

Statement

List of Generation Projects envisaged for 11 th Plan for Southern Region

T and D losses

1799. SHRI D. RAJA: Will the Minister of POWER be pleased to state:

whether it is a fact that Transmission and Distribution (T&D) losses have been rising alarmingly;

if so, the details thereof, along with the reasons therefor;

whether Government proposes to introduce some new technology to minimize the Transmission and Distribution losses; and

if so, the details thereof?

THE MINISTER OF POWER (SHRI SUSHILKUMAR SHINDE): (a) and (b) The draft report on Performance of State Power Utilities for the years 2004-05 to 2006-07 prepared by the Power Finance Corporation indicates that the Aggregate Technical and Commercial (AT&C) losses [which includes Transmission and Distribution (T&D) losses also] of the State Power Utilities at the national level for 2004-05,2005-06 and 2006-07 were 34.33%, 34.54% and 32.07% respectively of the total energy available for sale. There has been an arrest in the increase of AT&C losses in the country. The reasons for losses include technical reasons such as overloading of existing lines and substation equipment, old and outdated network, low HT: LT ratio, poor repair and maintenance of equipment, non installation of sufficient capacitors, substandard, inefficient and poor quality distribution equipment, poor power factor of consumer end devices etc. as also commercial reasons such as defective meters, theft and pilferage, tampering of meters, low accountability of employees, poor metering efficiency, poor billing efficiency, non realization of dues etc.

(c) and (d) It is proposed to introduce a restructure Accelerated Power Development and Reforms Programme (APDRP) in the Eleventh Five Year Plan with focus on establishing baseline data of AT&C loss and IT enabled automated energy accounting systems, IT
